DETAILED ACTION

Election/Restrictions

The election of species XIII (Fig. 22B) and associated claims 16-20 and 23 without traverse is acknowledged and is made final.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 16-20 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by EDOGA (5,746,766).

As to claims 16-18, EDOGA (Fig. 16) discloses a prosthesis/stent 605 having a plurality of cells, flattened bulbous tails 609/611 at the top and bottom of the cells.

As to claim 19, the flattened bulbous tails 609/611 in Fig. 16 are contouring into the body of the prosthesis 605 as shown in Fig. 16 copied and shown below:

Art Unit: 3731

As to claim 20, in comparison to Fig. 22B, 22C and specification lines 5-15 of this application, the adjacent flattened bulbous tails 609/611 of the EDOGA prosthesis/stent 605 are staggered longitudinally as well.

As to claim 23, see above rejections of claims 19 and 20.
